PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 10+ years building and scaling production web platforms across fintech, e-commerce, insurance, and EdTech. Specialized in Golang and React/Node.js, with hands-on ownership of a 2.5M+ line monorepo and 32+ microservices at enterprise scale. Recent focus on applied GenAI — designing RAG pipelines and agentic workflows that move features from concept to production faster. Track record of cross-functional delivery, mentoring, and shipping accessible (WCAG-compliant), high-performance applications across global, multi-country deployments.

KEY ACHIEVEMENTS

- **Scaled platform architecture:** Owned and maintained a 2.5M+ line frontend monorepo across 32+ microservices for 3+ years with zero major outages attributable to core platform changes.
- **Drove GenAI adoption:** Designed and shipped RAG pipelines and agentic workflows that reduced manual workflow steps for end users, accelerating feature delivery cycles.
- **Led global e-commerce rollout:** Engineered a micro-frontend cart component deployed live across 11 countries, supporting high-volume checkout traffic with no regional downtime.
- **Modernized legacy systems:** Migrated core jQuery modules to React with 100% backward compatibility, cutting front-end technical debt and improving maintainability.
- **Improved system observability:** Implemented Datadog and Amplitude instrumentation that gave engineering and product teams real-time visibility into performance and user behavior.

CORE TECHNICAL SKILLS

- **Languages & Core Tech:** JavaScript (ES6+), TypeScript, Golang, HTML5, CSS3, Ruby on Rails, SQL
- **Frontend:** React.js, Redux, Angular, jQuery, Bootstrap, Responsive & Accessible (WCAG) UI Design
- **Backend & APIs:** Node.js, Express.js, REST APIs, Microservices Architecture, WebSockets
- **AI / GenAI:** Retrieval-Augmented Generation (RAG) Pipelines, Agentic Workflows, LLM Integration, Prompt Engineering
- **Databases, Caching & Messaging:** PostgreSQL, MongoDB, MySQL, Redis, Apache Kafka, Event-Driven Architecture
- **Cloud, DevOps & Monitoring:** AWS (Lambda, Amplify), Kubernetes, Docker, CI/CD, Git, SVN, Datadog, Amplitude
- **Testing & QA:** Jest, Enzyme, React Testing Library, Snapshot Testing, Unit & Integration Testing
- **Design & Collaboration:** Figma, UI/UX Strategy, Agile/Scrum, Cross-Functional Leadership

PROFESSIONAL EXPERIENCE

ValueLabs

Oct 2020 – Present

System Analyst / Senior Developer

Client Outreach — Sales Orchestration Platform

Dec 2022 – Present

Tech Stack: Golang, React, Redis, Kafka, Datadog, AWS Amplify, Figma, Kubernetes, MongoDB, PostgreSQL, Ruby on Rails

- Maintained and scaled a 2.5M+ line frontend monorepo across an architecture of 32+ microservices over a 3-year tenure, supporting continuous feature delivery without major service disruption.
- Designed, built, and iterated on Retrieval-Augmented Generation (RAG) pipelines and agentic workflows, introducing GenAI-driven capabilities into production and accelerating feature turnaround time.
- Redesigned core product modules using Figma-based interactive wireflows, improving user journey clarity and telemetry tracking accuracy.
- Built full-stack features in Golang and React; managed high-throughput message streams via Kafka and optimized response times using Redis cluster caching.

- Established production-grade telemetry and performance analytics using Datadog and Amplitude, improving incident detection and response time.
- Maintained strong unit test coverage with Jest and React Testing Library while resolving complex full-stack production issues.

Snapfish — Global E-Commerce Platform

Dec 2022 – Sep 2023

Tech Stack: *React, Ruby on Rails, MySQL, Jest, jQuery*

- Engineered and optimized a critical micro-frontend checkout component ('cart-app') deployed across 11 countries, supporting global e-commerce traffic.
- Led migration of legacy jQuery modules to modern React components, maintaining 100% backward compatibility and reducing long-term maintenance overhead.
- Built Proof-of-Concept (POC) solutions for web application security hardening and page-load performance optimization.

Bronte — Pearson Education Portal

Oct 2020 – Dec 2022

Tech Stack: *React, TypeScript, Node.js, AWS Lambda, WebSockets, HTML5, CSS3, Jest*

- Developed interactive React modules including Knowledge Maps, Publishing systems, and Schema Editors used across the education platform.
- Built serverless backend logic and microservices middleware using Node.js and AWS Lambda.
- Resolved application-wide WCAG accessibility compliance issues and cross-platform compatibility errors, improving usability for all users.

PwC India

Sep 2019 – Oct 2020

Senior Engineer

Grange Insurance Portal

Sep 2019 – Oct 2020

Tech Stack: *Gosu, React, Redux, Angular, UI/UX Strategy*

- Contributed to the end-to-end greenfield architecture and development of a comprehensive insurance platform covering underwriting, billing, and claims.
- Led client communication to capture UI requirements, translating business needs into high-fidelity UI/UX designs.
- Built responsive, interactive web pages using both Angular and React/Redux architectures.

LTI (Larsen & Toubro Infotech)

Jul 2017 – Sep 2019

Engineer

Campus CMS

Sep 2017 – Sep 2019

Tech Stack: *React, Java, Azure*

- Contributed to development, testing, and feature scaling of a content management system with role-based access control and multi-tiered permissions.
- Executed platform migrations and production support fixes, improving system stability.
- Trained team members on modern JavaScript (ES6) standards and enterprise Java practices.

EDUCATION & CREDENTIALS

Executive M.Tech in Artificial Intelligence & Data Science — Indian Institute of Technology (IIT), Patna

In Progress — Year 1 Completed

B.Tech in Electronics & Communication Engineering (ECE) — UP State University

ADDITIONAL INTERESTS

- **Competitive Chess:** Achieved a peak online rapid chess rating of 1800.
- **AI Exploration:** Ongoing self-directed study of neuro-symbolic AI, Small Language Models (SLMs), and cost-efficient AWS infrastructure design.
